

Kinross Farm

HAUGH UNIT

< 50 Not Fresh

60-70 Minimum Industry Standard

70-80 Good

> 90 Excellent

Kinross Farm test haugh units every during processing and has an average haugh unit of 96

Haugh Unit is a measure of the freshness of the egg. It is the height of the albumen (white) of the point of intersection with the yoke.

The greater the height of the albumen the fresher the egg.

NOTE : Egg freshness and quality is determined by
The age of the egg, Feed quality, Age of the hen, Refrigeration (10c-14c)
and the Bird's health
